2. Introduction

The document describes the profiles of certificates, CRL-s and OCSP responses issued by KLASS3-SK 2016.

This document complements Certificate Policy [2] and Certification Practice Statement [1].

The organisation certificates are divided into following types:

- **e-Seal Certificate** - used for proof of integrity of a digital document and the relation with the owner of such document (e-Seal certificate can be issued also without extension "id-etsi-qcs-QcSSCD" see [3.2.2]);
- **Certificate for Authentication** - certificate used for authentication of the subscriber in WWW, S/MIME or other data processing systems;
- **Certificate for Encryption** – certificate used for data encryption.

Various areas of application can be combined into a single certificate. The area of application of e-Seal Certificate cannot be combined with other areas of application.
